Data Dictionary

for the Nebraska Community Opportunity Map

Updated April 2021

A free tool putting vital community data at your fingertips
– to ensure informed decisions for Nebraska's families.

WHAT INFORMATION IS INCLUDED IN THE DATA DICTIONARY?

The Data Dictionary of the Nebraska Community Opportunity Map provides the following information for each data point listed as part of the Nebraska Community Opportunity Map:

- Detailed indicator definition
- General and specific source information
- Data type (e.g. rate per 1,000)
- Age range
- Specific numerator used to calculate the rate
- Specific denominator used to calculate the rate
- Timeframe
- Data suppression information, if relevant

HOW IS THE DATA DICTIONARY ORGANIZED?

The Data Dictionary is organized in alphabetical order, by indicator title.

WHAT IS THE MULTI-YEAR FUNCTION?

The multi-year function shows a sparkline of change over time from the earliest to most recent year for which data is available.

AT WHAT GEOGRAPHIC LEVELS ARE DATA AVAILABLE?

The county level is the smallest geographic area at which the indicator data are available. Data are unavailable for state legislative districts that do not align with county boundaries. Please see Appendix A of the Data Dictionary for additional information about the availability of state legislative districts on the Nebraska Community Opportunity Map.

Child Abuse and Neglect Substantiated Reports

Definition: Child abuse and neglect substantiated reports are a subset of the total number of reports of child maltreatment that were made in a given year. "Substantiated" means that a determination was made that the incident of maltreatment did occur. "Child abuse/neglect" is defined by the Nebraska Department of Health and Human Services as physical, emotional, or sexual harm done to a child birth through age 17. This harm may occur either through abuse or neglect. The child abuse and neglect substantiated report rate is the number of such reports per 1,000 individuals age 17 and under in a given county.

2016	U.S. Census Bureau, 2012-2016 5-Year American Community Survey, Table B17001.

Type of Data	Age range	Numerator	Denominator	Timeframe	Data suppression
Percentage	4 and under	Number of individuals 4 and under whose household income places them below the federal poverty line	Total number of individuals 4 and under for whom poverty status is determined	Five-year period up to and including the given year (e.g., 2017 includes 2013-2017)	No data are suppressed

Children in Out-of-Home Care

Definition: The out-of-home care rate is the number of children in out-of-home care per 1,000 individuals 18 and under in a given county. Included in this population are: 1) state wards in out-of-home care through the Nebraska Department of Health and Human Services (NDHHS), 2) young people out-of-home who are supervised by the Juvenile Division of the Administrative Office of Probation, 3) state wards placed at the Youth Residential Treatment Facility (YRTC), and 4) young people who are involved in more than one of the above systems. Excluded from this population are state wards currently on a trial home visit. Out-of-home care data presented reflects a point-in-time count as of June 30 of the given year. Data includes both children who are state wards and children who are tribal wards.

Source: *Nebraska Foster Care Review Office; Nebraska Department of Health and Human Services, Division of Children and Families*

2017	U.S. Census Bureau, 2013-2017 5-Year American Community Survey, Table B09002.
2016	U.S. Census Bureau, 2012-2016 5-Year American Community Survey, Table B09002.

Type of Data	Age range	Numerator	Denominator	Timeframe	Data suppression
Percentage	17 and under	Number of own children 17 and under in families with either a female householder, no husband present or a male householder, no wife present	Total number of own children 17 and under living in family households	Five-year period up to and including the given year (e.g., 2017 includes 2013-2017)	No data are suppressed

High School Graduation Rate

Definition: The high school graduation rate is the 4-year cohort graduation rate among students in Nebraska public schools. Data from school districts is mapped by the data provider to match with the most relevant county.

Source: *Nebraska Department of Education*

2019	Nebraska Department of Education, Four Year Cohort Graduation Rate (Countywide - Public Districts) 2018-2019. Data provided by Nebraska Department of Education and prepared by Voices for Children in Nebraska.
2018	Nebraska Department of Education, Four Year Cohort Graduation Rate (Countywide - Public Districts) 2017-2018. Data provided by Nebraska Department of Education and prepared by Voices for Children in Nebraska.
2017	Nebraska Department of Education, Four Year Cohort Graduation Rate (Countywide - Public Districts) 2016-2017. Data provided by Nebraska Department of Education and prepared by Voices for Children in Nebraska.
2016	Nebraska Department of Education, Four Year Cohort Graduation Rate (Countywide - Public Districts) 2015-2016. Data provided by Nebraska Department of Education and prepared by Voices for Children in Nebraska.

Type of Data	Age range	Numerator	Denominator	Timeframe	Data suppression
Percentage	High school students	Number of students in Nebraska public schools who graduate high school in four years	Number of students in Nebraska public schools who entered 9th grade four years ago	School year	Data are suppressed for counties with either fewer than 10 students or fewer than 10 graduates in the cohort

Infant Deaths

Definition: The infant death rate is the number of deaths of children under 1 year of age to live births per 1,000 live births.

Source: Nebraska Department of Health and Human Services, Division of Public Health

2019	(Unpublished) Nebraska Department of Health and Human Services, Division of Public Health.
2018	(Unpublished) Nebraska Department of Health and Human Services, Division of Public Health.
2017	(Unpublished) Nebraska Department of Health and Human Services, Division of Public Health.
2016	(Unpublished) Nebraska Department of Health and Human Services, Division of Public Health.

Type of Data	Age range	Numerator	Denominator	Timeframe	Data suppression
Rate per 1,000	Under 1	Number of infant deaths	Total number of live births	Calendar year (Jan.-Dec.)	No data suppression

Juvenile Arrests

Definition: Juvenile arrests are the number of arrests of individuals 17 and under. An arrest is counted each time a person is taken into custody or issued a citation or summons. In the case of a juvenile (defined as a person age 17 and under) an arrest is counted when they are merely warned and released without any further action. The juvenile arrest rate is the number of such arrests per 1,000 individuals age 10 to 17. Note that, in interpreting this data, historically there is variation across the state in the frequency with which law enforcement agencies report this information. There is also historically variation in the number of law enforcement agencies opting to provide this information.
